Drawings

The drawings are objected to because in Fig. 3, upper pin numeral 6 should be numeral 60. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: on page 3, line 10, "pins 6" should be "pins 60". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Morin. Morin teach a drawer assembly (Fig. 1) comprising: four side boards (4-6), each of the four side boards having at least one first lug (10) on each of two ends thereof, at least one second lug (3) on one of two opposite sides of each of the four side boards, the four side boards being connected to form a four-side frame by arranging the respective at least one first lugs on two adjacent ends of two adjacent side boards in alignment with each other, four first pins (22) extending through the aligned at least one first lugs, and a bottom board (1) having at least one third lug (3) on each of four sides thereof, the four side boards being arranged to be connected to the four sides of the bottom board and four second pins (7) extending through the respective at least one third lugs and the respective at least one second lugs.

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
